

Technical Specifications

Product Description

MicroCg™ is a proprietary wastewater treatment chemical developed by Environmental Operating Solutions, Inc. MicroCg™ was designed specifically for use as an electron donor / carbon source for wastewater denitrification applications.

Innoflow Technologies are the authorized distributor for the Australasian Region.

Physical properties / Specifications

Physical State	Liquid
Color	Light Blue/Green
Odor	Mild Soap Odor
Specific Gravity @ 25°C	1.20
Density (lbs/gal)	10.0
pH	5.2-5.8
Viscosity (centipoises)	~ 20
Solubility in water	100%
VOC Concentration	0% (EPA 8260B)
Freezing Point	18°F (-6.7°C)
Flash Point	Does Not Flash
COD Value	670,000mg/L
